F.U.N. Show Auction to Test Certified Morgan Dollar Market

The market's spirit of optimism, fueled by the upward movement of Mint State Gold during late 1992, finds dealers quite optimistic about 1993. Much of the growth in rare coin Bid levels during 1992 came in the 'middle' collector grades of MS63 through MS65; in MS66 & MS67, demand was less certain, and numerous examples could be found of premium prices rising or dropping.

Bidding for certified coins has slacked off just a bit during the Holidays, after an exciting Fourth Quarter. Of course, most of the Bidding is taking place on PCGS and NGC certified coins. Bids for the other services remain sporadic; quite often, only a single bidder or two will be making a sight-unseen market in these services. This can create a real opportunity for the dealer who is totally confident of his own grading abilities when viewing coins sight-seen.

The current market for premium grade Morgan and Peace Dollars will be known soon enough, when Auctions by Bowers & Merena presents their F.U.N. Convention auction in Orlando on January 7-8: The John A. Van Arsdall, M.D. and the Antelope Valley Silver Dollar Collections Sale. As most Dollar collectors already know, the Antelope Valley Collection may just be the finest collection of certified Morgan and Peace Dollars to be assembled. Since space limits the number of highlights listed we will mention one of the 'lesser quality' duplicates from the collection — ***an 1893-S in MS63!*** Isn't life grand?

Just so that we cannot stand accused of favoring Dollars over other denominations, we will mention a few more highlights from the B&M auction: 1793 Large Cent (S-2) PCGS63 RB; 1793 Large Cent (S-14) PCGS40; 1794 Large Cent (S-48) in ANACS20; 1794 Large Cent (S-64) in PCGS62 BN among a hundred other desirable lots of these Early Coppers.

Heritage Auctions will also be holding one of their Bullet Auctions during the Fun Show, on January 6, 1992. Bidders will find 1250 lots of certified material, from $100 coins up to such desirable rarities as a 1795 Half Dime in NGC64, a 1796 Quarter in PCGS63, a 1908 Barber Half Dollar in PCGS Pr68, or a 1927 S $20 in NGC65.

The Professional Numismatists Guild has recently announced the establishment of a 24-hour "FAX" hotline to combat telemarketing fraud in the rare coin industry. By helping to stop consumer losses, through direct mediation or speedy transmittal of the complaints to the FTC, the PNG anticipates benefiting legitimate dealers and hobbyists. Through this action, PNG will be protecting a much larger audience with their Code of Ethics. Written complaints, containing all facts in the case, should be transmitted by facsimile (FAX) to 818-832-9946

Role of Mint State Gold Critical to Sunshine State's FUN Show

Just in time for the FUN Show, Mint State Gold prices are firming. Dealer confidence was dependent upon seeing some signs of stabilization, which is just what the market delivered this week. Both dealers and their customers look to Mint State Gold as one of the primary indicators of market health, and these sparkling pieces of American history have been very carefully watched during the past several months. Much of the optimism being expressed by dealers grew with the increased sales volume created by the rising prices of Mint State Gold. Students of human nature will continue to wonder *why* buyers always get more interested *after* prices have risen substantially; dealers will simply continue to sell gold coins to their cash customers.

The success of the FUN Shows and the Long Beach Shows reminds us of the importance of site. A successful show needs many ingredients; sufficient quantities of dealers, customers, and cash all contribute mightily. Dealers will go to any city *if* they know they will have a good show; they may grumble about going to Detroit, but they will still go. However, the success of a show also depends heavily upon the retail traffic that the show generates, and it is no secret that certain locations draw better audiences than others. The U.S. is currently witnessing some major shifts in spending patterns, with buyers seeking more durable products with less conspicuous consumption. Coins, depending upon how they are marketed, can be made to fit into either strategy. However, one thing seems more certain — being able to combine a family vacation with a coin show attracts more customers. It is no secret that warm beaches, especially during the cold seasons, are part of the winning strategy for show promoters.

Price levels for the Silver Commemoratives were mostly steady, with plus signs definitely outnumbering the declines; most of the advances can be found in the MS64-MS66 columns. A few Gold Commems (mostly in the 'lesser' unc grades) are showing declines due to discounted selling. Morgan Dollars are steady, with some scattered declines due to discounted sells, generics remain at "bargain" levels. Peace Dollars have not been generating much enthusiasm lately; watch for prices to climb rapidly here when the next rally gets cranking.

Mint State Type remains stable, with mostly plus signs scattered across the chart; MS64 specimens seem to be drawing their fair share of interest. Mint State Gold Type is relatively stable, with typical adjustments; no drastic declines this week associated with minus signs. Proof Type coins are steady, with a scattering of advances across the 'lower' grades; Proof Type doesn't usually lead a rally, but no rally is complete without *substantial* advances here. Proof Gold Type is steady with a few scattered advances to make life interesting.

During the last two years, the specialty series have turned in a performance that can best be described as "steady"; a glance at the appropriate CMI charts will confirm that. Buffalo Nickels are steady. Mercury Dimes were mainly steady, with a small number of price adjustments; MS65FB Dimes continue to attract most of the upward activity. Walking Liberty Halves are steady, with some advances in the later-date MS65s. Proof Singles continue mixed, these coins seem to drift along for months at a time, only to 'come alive' with a flurry of activity.

The Certified Coin Dealer newsletter [illegible] Bluesheet reports current wholesale market Bids [illegible] reported sight-unseen Bids, Asks, Trades, price levels, and auction prices. The CCDn may not respond to the removal of a high bid [illegible] CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown [illegible] CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective (on one or both sides) with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

FUN Show Ends Strong
Slabbed Coins Highlight Auctions

Florida United Numismatists hit upon a great idea with their early January FUN Shows. With much of the nation beset with cold, sleet, snow and the like, it's not hard to see why dealers would enjoy a few profitable days in the sun. The Show has long passed 'critical mass', that point where so many important dealers attend that attendance by the others becomes a *necessity*. This status is enjoyed by only a handful of shows.

There is a small drawback to being a major show, especially one that occurs at the very start of a new year. If the show is slow, dealers may either take that as an accurate reading of the mood of the market or they may blame the show. We all know that there have been some poor shows during the past decade, either because of city location, show location (i.e. parking structures), or just poor market conditions. Every year FUN runs the risk of having dealers spend a bad year saying 'this year has been lousy since the FUN Show', and nearly every year, FUN starts them off on an upbeat note. At least some of the credit for success has to go to the organizers; a well-run show lets dealers make the *most* of the *existing* market.

This year's FUN Show started out slowly, a fact lost on few of the dealers attending; a fair amount of market uncertainty had tempered dealer's enthusiasm after their strong Fourth Quarter. During the course of the show, demand gathered for both quality coins, and those brought without much hope of finding a new owner. Most dealers reported a *strong* ending, and overall, a very good show. Hopefully, for the rest of the year, we will be hearing dealers say 'I've been having a *great* year since the FUN Show'.

Bowers & Merena hosted their $2 million Van Arsdall and Antelope Valley Sale at the FUN Show, and a standing room only crowd provided very visible evidence of the demand for quality coins. Many of the lots enjoyed substantial bidding activity; some had more than a dozen numismatists vying for the pride of ownership! The highlight Antelope Valley Collection helped establish current market values for premium quality Morgans, since such items come on the market very infrequently, it is sometimes difficult to obtain prevailing values. For some of the unique items, this was the first 'public' sale since the high flying booms of 1988 & 1989; minus signs may have resulted, but more important is the enthusiasm shown by the marketplace, the *demand*, for these beauties! Among the Antelope Collection Morgan Dollar highlights:

Issue	Cert. Grade	Price Realized
1879 CC	PCGS65	$13,200
1884 S	PCGS64	$37,400

1894 O	PCGS65	$20,900
1895	PCGS Pr67	[illegible]

Heritage Numismatic Auctions conducted another of their Bullet Auctions at the FUN Show, and three-quarters of a million dollars in certified material found new owners. While the Bullet sales have proven particularly effective in selling coins under $1,000, the Orlando Bullet Sale proved that more valuable items were also much in demand. Among the more valuable highlights:

CERTIFIED COIN DEALER newsletter

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

Vol. VIII No. 4 January 22, 1993 Single copy price $3.50

Auctions Demonstrate Market Strength Long Beach Show Combines Bids & Bourse

The coin market is continuing to quietly strengthen in the core grades, with dealers reporting healthy customer interest and activity. One aspect of the retail coin business may have changed forever as auctions have come to assume a more dominant role in the redistribution of collections, from the small to the mighty. Early 1993 auction sales prove the point. At the FUN show in Orlando, we witnessed Bowers & Merena's $2 million Van Arsdall and Antelope Valley Sale, with a standing room only crowd.

Stack's just concluded their public auction sale of "*United States Gold, Silver & Copper Coins Featuring Additional Selections From the Estate of Floyd T Starr And Other Important Consignments*" (which we assume will be mercifully abbreviated to 'Starr Part 2'), and a large audience pushed the prices realized past the $2.2 million mark. While much of the sale consisted of raw coins, a nice selection of certified material was available: (see inset)

Denomination	Grade	Price Realized
1903 Liberty 5¢	PCGS Pr65	$1,760
1797 Bust $1, B-3	PCGS15	$880
1921 Zerbe $1	PCGS PR65	$10,450
1877 Trade $1	NGC64	$1,980
1852 D $2.50	NGC55	$4,950
1908 $10 w/m	PCGS Pr64	$14,300
1936 S Bay Br.	PCGS67	$2,200
1936-D R.I.	PCGS66	$1,320

The upcoming Long Beach Show will naturally have its complement of auction sales. Superior Galleries will kick-off the hammering with their $5 million+ January 31-February 2, 1993 Auction, featuring the incomparable King of Siam Proof Set (certified naturally). We won't devote much space here to the fabulous history of this set and its 1804 Dollar — any serious numismatist will know the story and probably have a copy of the catalogue as well. The selection of Proof $20s — including *three Proof* High Reliefs — shouldn't be missed among the certified highlights in just the gold section will be found

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Silver Commemoratives Strengthen Which Series Will Star at Long Beach?

There are three series that we particularly like to see strengthen just before any major coin show (or at any other time, for that matter). Mint State Gold Type; Morgan Dollars; and Silver Commemoratives. Just about every dealer has their own favorite series that they use as a market indicator, or sometimes even a single coin is watched closely for what it can tell about market directions. Silver Commems are especially useful as an indicator of overall market strength. They are pursued by large numbers of collectors and dealers, and they offer a tremendous amount of collecting satisfaction (with their vastly different designs) for the purchase dollar. This week witnessed a definite solidifying of Bids on many issues, as well as some substantial increases. Notable are the large number of plus signs in the MS64-MS66 columns; we are starting to see more interest in the premium quality pieces.

	Grade	1/31/92	1/29/93	% increase
1921 Alabama	MS63	$472	$480	2%
1936 Albany	MS65	$422	$560	33%
1936 Columbia PDS Set	MS65	$702	$870	24%
1935 Connecticut	MS65	$590	$800	36%
1922 Grant Memorial	MS65	$970	$1260	30%
1924 Huguenot	MS64	$152	$166	9%
1923-S Monroe	MS63	$75	$86	15%
1935-S San Diego	MS65	$88	$106	20%
1936-D San Diego	MS65	$102	$118	16%

Mint State Gold Type and Morgans are continuing steady, but it looks like Silver Commems will have to be the source of any glamour for the Long Beach Show. We will have an early indication from Superior Galleries' "January 31-February 2, 1993 Auction". In addition to the *spectacular* King of Siam Proof Set, the catalogue includes three hundred lots of Silver Commems, many in high grade. From the 1893 Isabella in NGC67 to the 1936 York in NGC66, the specialists will be kept busy. Heritage Numismatic Auctions will be presenting both the official "February 1993 Long Beach Sale" and a Bullet sale. The main catalogue offers another 100 Commemoratives, including a trio of PCGS66 Isabellas. Her Royal Highness will be in demand at Long Beach to be sure!

For dealers, the auctions are the "dessert" to the main event — the bourse of the 15th Annual Long Beach Show, Feb. 4-7. Dealers are continuing their optimism, with most dealers predicting a "solid" show. It may be significant that dealers aren't expecting a "great" show; indeed, all market indicators suggest that a "strong" show is a realistic expectation.

ICTA will be conducting a special Broker Reporting seminar at the Long Beach Show, for members only, at the Convention Center Lobby Restaurant, Feb. 3 at Noon (*before* the 2 PM setup). Show badges for ICTA members will be prepared in advance. Copies of ICTA's new Broker Reporting kit will be available for purchase ($25 members; $275 non-members; $250 memberships will be available at the door).

King of Siam Set Exceeds $1.8 Million
Long Beach Week Starts Strong

The King of Siam Set, perhaps America's greatest numismatic treasure, has found a new home. Before a "standing room only" crowd at Superior's "January 31-February 2, 1993 Auction", the nine coins and case were won by Spectrum Numismatics, after an exciting bidding battle. For $1,815,000 (including the buyer's commission), Spectrum has won the bragging rights to an incredible piece of history, and will add their name to the list of illustrious owners. The coins contained in the set are well enough known; we won't try to elaborate on Superior's superlative description of the coins. We will, however, make a few observations about the *original* presentation *case* (as much a part of the history of this treasure as any of the coins). In some minds, the case *makes* the *set*; the unifying element, it adds its own mystique to ownership with its two empty openings. The new owners would seem to feel the same way, for they also purchased the 1834 Half Dime in Pr66 that has claims to be the missing coin. And isn't it just *wonderful* that such an important set should also contain the *finest-known* 1804 Dollar? Superior Galleries reported total prices realized for their Auction exceeding $8.1 million, and the enthusiasm of the bidders augers well for Long Beach.

While the *Bluesheet* charts are often quiet the week of a major show (as dealers are traveling to the show or attending the accompanying auctions), this week's charts still show plenty of plus signs. Since the beginning of the year, the ***CCDn Coin Market Index*** has shown some tiny declines which are more than offset by solid activity in several of the important series. Silver Commemoratives are up from 635.32 to 639.31. Proof Gold Type is up from 719.72 to 722.80; Walking Liberty Halves are up from 723.17 to 726.3. As the CMI indicates, this is now a market where each series traces its own cycle, and dealers will move in or out of areas they perceive as representing preferable inventory values.

Silver Commemoratives continue to show increases across the entire chart, with special interest in the MS64-MS66 grades; the plus signs in the MS65 column alone should warm the hearts of most dealers. Gold Commems are also advancing, although many of the increases are in the MS61-MS64 grades.

Morgan Dollar Bids were steady, but activity is still encouraging optimism. Peace Dollars are showing scattered and mixed changes. Mint State Type is showing mixed changes, with minus signs more apparent in the premium columns. Mint State Gold Type is mixed, and continues to demonstrate healthy trading activity. The Proof Type chart shows some scattered changes, mostly to the plus side; Proof Gold Type is steady as expected.

Among the specialty series, Buffalo Nickels remain steady, with few changes in either the early or later issues. Mercury Dimes are enjoying increased bidding levels in the early years, especially in the Full Band (MS64 through MS66) columns. Walking Liberty Halves are steady in the early issues, with a mixture of plus and minus signs in the later issues; excepting some declines in Type, the changes in the higher grades are mainly due to increases. Proof Singles levels are mostly steady, but there are more minus signs than we are used to seeing.

Active Long Beach Brings in Buyers
Heritage Auction Establishes Demand Levels

It sounded so familiar that at first we didn't even react — it took a second to register just *how long* it had been since we had heard those familiar words "There was *electricity* in the air." And no, they weren t talking about the crazy weather that Southern California has been experiencing recently. The subject was the Long Beach Coin Show and its accompanying auctions. At the risk of mixing metaphors, it could well be that the magnificent King of Siam proof set was the lightening rod attracting that kind of numismatic *electricity*. That is probably true enough, but it seems that the excitement in the market is more widespread than could be expected to come from a significant event or major sale. We are hearing from more dealers that their retail activities are picking up; collectors are beginning to *like* coins at current price levels, and are willing to spend the bucks necessary to assemble those coveted collections. One dominant theme we hear repeated, is that relative price stability has buyers convinced that prices are not going to drop further, so *now is the time* to snap up those treasures.

Long Beach attracted a large crowd, and we saw abundant examples of wholesale and retail activity. Naturally, dealers always wish that the show had been busier and more profitable; that seems to be part of the business — who among us couldn't use a few more dollars in our pocket? More significantly, most dealers were reporting activity that was between "active" and "strong". Some coins are still being sold for occasional losses as dealers continue to match their inventories with current interests, but the current market at current levels provides dealers the opportunity to make profits. Those dealers who have spent the most time and effort cultivating their retail customer base are naturally doing the best.

Heritage Numismatic Auctions presented the official Long Beach 1993 sale, and reported strong attendance and active bidding. Anyone concerned about market demand for quality coins only had to look at the lines for lot viewing bidders were serious about viewing the material before the sale and serious about raising their paddles in the air once it started. Total prices realized exceeded $1 2 million and the accompanying Bullet sale passed $600 000. Among the highlights of a spectacular run of Indian $5:

Issue	Grade	Price Realized
1909 S $5	PCGS65	$28,050
1910 S $5	PCGS65	$18,610
1911 $5	PCGS64	$7,260
1911 D $5	PCGS63	$14,850
1912 S $5	PCGS63	$7,370
1914 D $5	PCGS64	$10,560
1914 S $5	PCGS63	$7,260
1916 S $5	PCGS64	$6,853

Actually, the very success of Long Beach allows us to explore a sometimes confusing subject All the ingredients were there for a successful auction. Heritage produced a superb catalogue, many coins were scarce and superb, and there was an eager audience; yet, we find some of the rare Indian $5s selling under *Greysheet* Bid (these individual dates are not listed in the *Bluesheet*). The answer to that seeming contradiction is actually quite simple. On really rare material, the *Greysheet* will always be a lagging indicator because it reports (not *predicts*) market behavior. The best information is always available for the most actively traded coins; everyone knows the market for MS65 Morgans. A really rare coin may not have sold for two years, so old information is the best obtainable; regardless of whether the entire market has risen or declined, that coin will exhibit its own demand in its next appearance. The market provides the information, and the *sheets* change to reflect the new reality.

Buyers & Sellers Come Together on Value Coin Trading Defines Market

We are seeing an interesting phenomena on many of the charts despite a *strengthening* market, we note a distinct number of *minus* signs. Is this necessarily contradictory? We don't think so, and the negative perception created by the minus signs is misleading. We have, on many previous occasions, discussed the psychological implications of plus and minus signs. Simply put, an "up-market" creates many plus signs, and the *signs* sustain the psychology of an up-market. The opposite, naturally, is equally true in a declining market.

However, when a market *strengthens* — in depth and breadth — it doesn't necessarily produce any plus signs at all. An oversimplification will illustrate the point: imagine a series with 15 coin types (all in seven grades, naturally), and that dealers are in general agreement that the Bids represent the current market value of the coins. It is entirely possible that at some time less than a dozen dealers will have active Bids at those levels, and those may be only in MS64s and MS65s; that is the nature of the coin business. Every dealer does not have a customer for every coin, and they certainly wouldn't want to pay *top* dollar on a 'flier' for inventory. Then, at another time, imagine that there are a large number of dealers actively pursuing the same coins *at current levels*, and every coin in every grade has multiple bidders within 5% or 10% of Bid. We haven't produced a single plus sign, but the second market is multiples stronger than the first, and will also produce many times more activity.

What about those minus signs? The ***Bluesheet*** reports the most current information available, and sometimes Bid is held steady on a rarely-traded coin that has *theoretically* dropped in value. When a coin is offered or actually sells at a lower level, the drop becomes real and we publish the change. If this was true of every trade it would define a "down" market, but when we see growing market support at current levels, we know the meaning is very different. Buyers and sellers are increasingly coming together, are increasingly sharing a concept of value at current levels; this will naturally result in increased trading activity, which we are also seeing.

Again risking being too simplistic, a trade occurs when a buyer and a seller come together on terms; there is a 'meeting of the minds' on the current value of the coin. The wholesale market value of a rare coin is ***defined*** by such activity. We recently heard a complaint from the seller of a high grade Seated Dollar that the coin was sold too cheaply, but the fact remains that at the time of the transaction, a value was *declared* by the trade. Goodness, we have all heard other dealers complain that they 'buried' themselves in a coin that appealed to them (perhaps a bit too much appeal), but in a free market, values are decided by actions and not afterthoughts. Of course, the afterthoughts determine the level of the next trade, be it higher or lower, and the market moves accordingly. Slowly moving market values do have the advantage of allowing both the buyer and seller to feel that they made an intelligent trade, and that is also something that we are seeing more of — or, to be more specific, we are *hearing* fewer complaints of under- or over-payment. We know that dealers would like at least another six months of relative stability as a foundation for a slowly rising market, and at the recent Long Beach show, we heard many customers comment on their preference for a more stable market.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Trading Activity Remains Strong Asks Continue to Frame Market Values

Merging the *CCDn ASKSHEET* into the ***Bluesheet*** made a lot of sense, especially for ease of use. Market reactions continue to be favorable, and we hear from many numismatists how ***useful*** it is to have the two parameters of value side-by-side. One advantage of a separate *ASKSHEET* was that it allowed us to focus editorially on the importance of the Ask (or the Last Trade) to the valuation process. Dealers tend to think in terms of ***Bid***, reflecting the traditional way that demand levels have been communicated in this business (and many others, to be sure). While the electronic messaging systems have been running "Sell" messages for many decades, even they are usually evaluated in terms of Bid levels. In the auction end of the coin business, Bids have always been of critical importance. Whether **sight-seen** or **sight-unseen**, Bid is the accepted 'shorthand' manner of communicating *value* information.

As coin market information has become more efficient, most "computer-types" would have predicted a narrowing of the spreads between Buying and Selling prices. That has certainly happened with the more populous, generic material. But for really rare material, the spreads have grown even larger. The key factor in this process is the rise of the population reports of the certification services. The rarity of certain items *in a specific grade* has been demonstrated, and the owners of such low-pop, premium grade coins naturally want top dollar for their merchandise. Such prices, of course, are usually negotiable, and that has led to a second trend. Where such coins are advertised for sale with a *stiff* price attached, it is common to find a lack of serious bidders for the item.

This reaction, as relayed to us by one major player, is simple. The market knows that a coin is available at, say, the $10,000 level. If a serious high bidder is at a reasonable $8,000 level, then the final selling price is going to be between $8,000 and $10,000; it would be extremely unlikely that the coin would trade below $8,000. Assuming, however, that the highest visible bidder is at $4,000, then even though *everybody* knows it is worth *substantially* more, the negotiating range starts much lower. Nothing like a stable market to bring out the differing negotiation styles!

The coin market is continuing to strengthen, even though it still isn't producing an overwhelming number of plus signs. More bidders are seeking material at current levels, and that is a sure sign of strength. Many of the minus signs continue to be for relatively small drops, occasioned by a seller dropping incrementally to make the trade *happen*. The best indicator of market health, no, the best ***definition*** of market health is the concurrence of buyer and seller on value, resulting in a trade. It does no one any good to have too-low bidders refusing to come to terms with too-high sellers; that is proof only of the lack of agreement on market value. We expect to see even more trades as the market continues its stability, and gives both buyers and sellers a chance to reflect on values, directions, and inventory considerations.

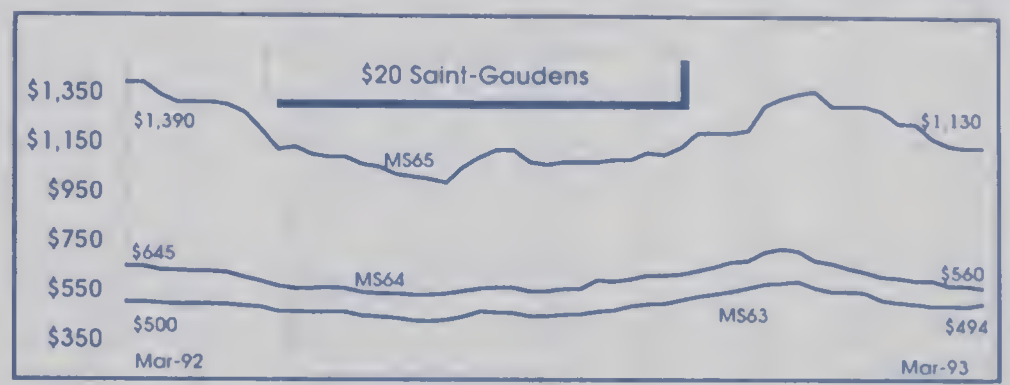
Market Steady As Trading Active
Dealers Keeping Close Eye on Mint State Gold

The coin market continues to show signs of strengthening, with trading activity the 'leading indicator'; trades remain the source of most minus signs found in this week's *Bluesheet*. Dealers are confident, but it is not the *usual* confidence of a *rising* market; in some cases, dealers are willing to sell coins at $500 to the highest bidder instead of waiting at the $535 level for a buyer to "come along some day". Dealers prefer taking *advantage* of marketplace bidding to "move coins"; by not holding out for the "last dollar", dealers may create enough trading activity to move those levels up anyway.



The ability to 'take the profit' instead of 'holding out' for even higher prices made substantial profits for many dealers as 1992 closed. A strengthening market seemed to have focused its attention on Mint State Gold, with some pretty spectacular increases. We charted the March 1992-March 1993 levels for $20 Saints in MS63, MS64 & MS65. The MS63s were $500 one year ago; Bid dipped as low as $423 before recovering to hit $585 in late December. Anyone still holding at $494 hasn't been hurt much, granted, but if they were 'holding out' for $625, they may need to await another buying spree. MS64 Saint Types were $645 last March, bottomed at $530 just after mid-year, and rose to $720 in December; a $200/coin profit was available to those who took advantage of the rise. At just $560 now, makes you wonder who will profit during the next increase doesn't it? MS65 Types were declining last March, and from the initial $1,390 they would dip as low as $985 before hitting $1,360 the last week of the year. A $400 loss, or a $400 gain, or a $200 loss — timing may be everything, but so is the discipline to buy when 'no one' else is buying, and to sell when everyone else is buying. There is still much to be said for "buying low & selling high".

Bowers & Merena will be hosting their Edmonton sale in New York City on March 19 & 20; bidders planning on attending should be aware that **the location has been changed to the Omni Park** following last week's tragic bombing. Early copper specialists will be interested in a trio of 1828 Half Cents (all B-2 and all PCGS63 BN), an 1807/6 Large Cent S-273. Other desirable cents include an 1856 Flying Eagle in PCGS63, an 1858/7 FE Cent in PCGS63, a 1909-S VDB in PCGS66 Red, and a 1914-D in PCGS65 Red. Gold specialists will also find many highlights: 1856-D $1, PCGS55, 1839-D $2.5, PCGS40, 1839-O $2.5, PCGS63, 1875 $2.5, PCGS30; 1809/8 $5, PCGS53, 1834 Classic Head $5, NGC Pr62; 1838-D $5, PCGS55; 1883 $5, NGC Pr64 Cameo; 1798/7 $10, PCGS40; 1804 $10, PCGS61; 1876 $10, PCGS Pr55; 1907 $10, Periods & Wire Rim, PCGS61; 1857-S $20, NGC64; 1871 $20, NGC63; 1905 $20, PCGS63; and a 1907 RN, NGC Pr62.

Activity Still Picking Up
More Stable Market Yields Benefits

This week we continue to see a strengthening market, as well as a *seemingly contradictory* number of minus signs. The activity in the coin market is real enough. We are noticing an increasing number of *active* bidders *at current levels*, especially on the coins grading MS61 through MS64; bidding on the premium quality rare coins is still a little spottier, but improving there as well. Not only are there more bidders, but they are bidding on more coins as well; and a nice proportion are actively raising Bid in order to fill their needs. As you can judge from the number of plus signs appearing on the charts, quite a few of the Bids are for higher amounts.

So, what about that "larger than expected" number of minus signs? Simply, they are being generated by sells at a slight discount to current Bid levels. Everyone in the coin business has either bought or sold a coin $5 behind Bid, for any one of a thousand reasons. Unfortunately, if there is not a current bidder at the current level, such a sale (or such an Ask) is going to result in a minus sign. This has the unfortunate effect of making the market look weaker than it actually is. When a coin Bids at $2750 but sells for $2725, the market should rejoice in the fact that coins are trading hands; don't get too distracted by the minus sign that such a transaction will generate. The $25 drop in Bid is legitimate enough (in fact, some dealers would argue that Bid in this case should drop below the $2725 level), but a real buyer at that level sounds like a solid Bid to us.

Part and parcel are dealers' beliefs in the advantages of a stable market. In the stock market, brokers can make money whether stocks are going up or down. In the coin market, without a real *shorting* mechanism, dealers have looked to rising markets for the bulk of their profits (this is hardly surprising in an *inventory-based* business). While down markets hurt inventory values, at least they encourage sellers of material to be more receptive to negotiation over prices. In the past, dealers have reacted most unhappily to *stable markets*, as they seemingly encouraged customer boredom. After the extreme volatility of the certified market over the last five years, dealers have had a major change of heart — they are now *more than happy* to see some stability in price levels. Actually, they are happy to see "a lot of stability" in prices. And to the dealer, our hypothetical coin selling at $2725 is a ***stable*** transaction.

Silver Commemoratives continue to show signs of strengthening, with plus signs dotting the 'lesser' uncs, and even a few advances on the higher grades. The XF/AU market is quite strong, thus forcing the lower unc grades to higher levels. Gold Commems are also showing a few advances, with most of these in MS65 and below as well. Morgan Dollars are steady, with advances outranking the declines which resulted from discounted selling. Peace Dollars are steady, with selected issues climbing. Mint State Type is steady, with scattered plus signs. Mint State Gold Type showed a number of adjustments, and most of these were advances. Proof Type is steady, with selected issues in Pr65 and below advancing. Proof Gold Type is steady. Buffalo Nickels are steady, with MS65 & MS66 garnering most of the advances. Mercury Dimes are steady, with a generic drop accounting for most of the minuses. Walkers are steady, with special interest in later dates in higher grades. Proof Singles are also advancing.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be semi-reflective (on one or both sides) with less reflectivity than the deep-mirror Prooflikes. Bids for P.L.'s are usually much lower than for DMPL's but command some premium over non-P.L. strikes.

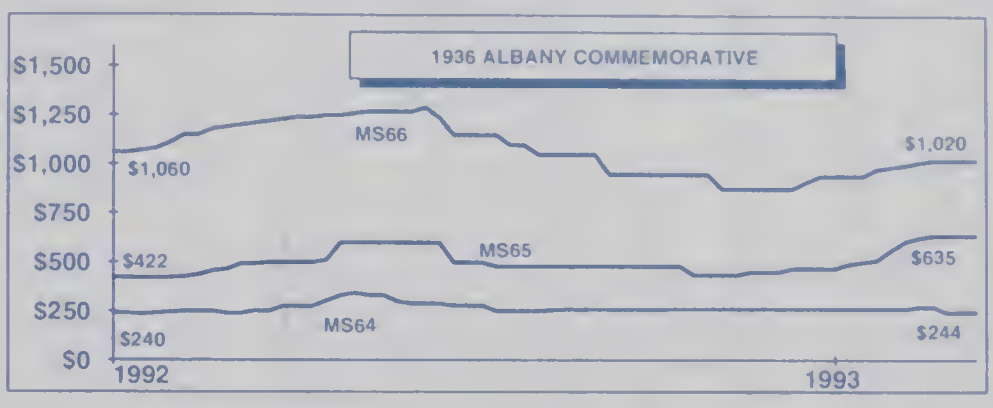
Commemoratives Attract Collector Support
Issue & Grade Selection Critical

If there is one characteristic of a collector dominated market, it is that such buyers want to get a *lot* of purchasing ***pleasure*** out of their purchasing dollar. It goes without saying that 'pleasure' will have many different meanings to different buyers, but there are some collecting constants. For example, collectors have long agreed that the Commemorative Silver series provides pleasure & value in both *coin* & *history*. The attractiveness of the many different designs and the history represented make them favorites.

Even collectors planning on long-term holding, have to keep in mind the financial parameters of their decisions, especially the decisions on grade. There are issues where the MS61-MS65 spreads are hardly noticeable, while others display significant differences in Bid. Many Commem collectors, whether chasing the 50- or 144-piece set, are more interested in purchasing coins with a certain "look" than they are in slavishly pursuing a *particular* grade. Their idea of a matched set has more to do with appearance (toning, strike, luster) than just grade; that is not to say that grade isn't important, but only that a range may be considered in the light of several factors.



The 1936 Albany, a favorite coin, well illustrates the consequences in grade selection. For the collector putting together a collection in the MS64-MS66 range, timing would have been a very important factor in his purchasing decisions. The MS64 was Bid at $240 in January of 1992, and during the course of the year climbed as high as $342 before returning to its current $244 level. The net effect of a 15-month delay in buying would be a $4 increase (and for the investor, the lost chance at a $102 profit). The MS65 Albany was Bid at $422 in early 1992, climbing to $600 mid-year, only to slide to $435 before climbing to the current $635 level (posting a 15-month gain of $213). In MS66, the Albany Bid climbed from $1,060 to $1,290 before returning to $1,020. While a full strike on the beaver may be a problem below MS64, you are going to get a mighty fine coin whether you purchase an MS64, MS65, or MS66. Whether buying for a collection or for an investment, timing is *everything*.

Activity in the market seems to have slowed slightly this week, although there are no signs of a "Sell-off" of any sort. While the market has recently been active and steady, this week dealers seemed to be "taking stock" of the market. One possible factor is the weather conditions Back East, and the fact that some dealers have had a difficult time traveling to and from shows. With a blizzard raging outside, dealers may be more concerned with well-being than wealth.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Market Steady While Demand Dips Profits Taken In Mint State Gold

In the *Bluesheet* editorial of March 5, we headlined that dealers were keeping a close eye on Mint State Gold Type. The late-1992 run-up of Gold had fueled a market rally, but while much of the market was continuing to enjoy growing demand, Mint State Gold seemed to be poised for additional profit-taking. Apparently, dealers were watching Mint State Gold even closer than we explained. This week, minus signs were scattered across the MS61-MS65 columns with some of the drops being rather substantial. It may be a sign of the times, but it seems that when dealers decide to reduce inventory, they will simply sell into the market at existing Bid levels instead of attempting to make a sale closer to Ask levels.

The recent trend toward selective demand seems to be continuing. Many of the charts exhibit the bulk of demand on specific grades; most notable in this regard would have to be the Buffalo Nickels. While it is *generally* true that most of the demand in this *collector's* market continues to be for coins graded MS65 and below, each chart must be evaluated in the light of the demand for that chart! Comparing MS64 through MS66 on the Silver Commem chart against activity in Buffalo Nickels or Mint State Gold reinforces the point. In this market, savvy buyers need to rely upon very specific information in order to establish satisfactory purchasing levels. Sellers need to be aware of the floating supply of like-pieces in the marketplace, especially if some are being sold 'to market'.

Silver Commemoratives were largely steady, with scattered plus signs to be found in all grades; more surprising are the minus signs in MS65 triggered by discounted selling. Gold Commemoratives declined, with most of the minus signs found below MS65. Morgan Dollars continue to exhibit the selective demand that has characterized activity in this ever popular series. Plus and minus signs are scattered across the columns as dealers manage their inventories. Morgans are strongest in the MS65 and below grades, but that hasn't prevented a healthy number of plus signs in MS66. Mint State Type is steady, with some advances among the 'lesser ones'. Several issues in Mint State Gold dropped, some displaying substantial declines. Proof Type was mixed, with trading activity picking up somewhat. Proof Gold Type welcomed several advances in this usually steady area.

Buffalo Nickels displayed a major movement upward in MS65 and MS66 in early *and* late dates. The Buffalo CMI has tracked the overall CMI very closely over the past three years; while both have remained steady recently, this sudden flurry of activity comes as quite a surprise to many dealers. It will be closely watched to determine if this is specific demand tied to marketing, or the harbinger of a general market movement. If Mint State Gold had moved in the opposite direction, we would probably be a little more optimistic. Mercury Dimes were largely steady, with the advances again concentrating on the MS65FB gems. Walking Liberty Halves were steady in the early dates, with some advances in the MS65 later dates. Proof Singles, dormant for some time, showed a remarkable number of increases in the MS65-MS67 grades.

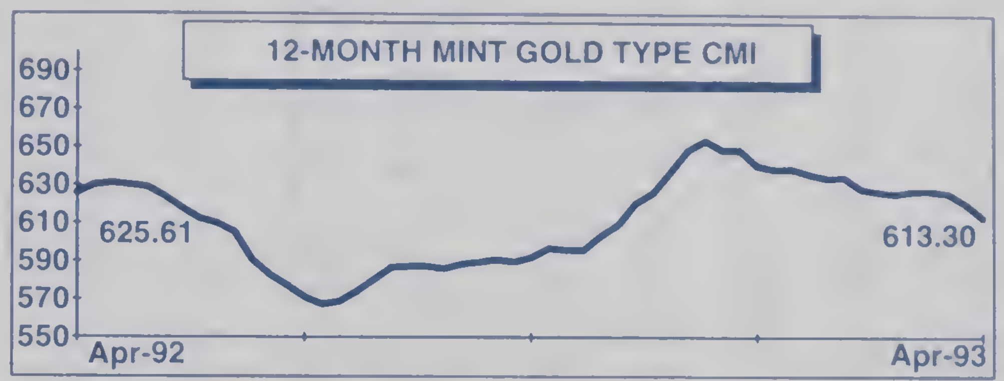
The Right Coin at the Right Time Is An Unbeatable Combination

The recent volatility in gold has encouraged us to continue our examination of the movements in gold and its effects on the overall market. We know that dealers certainly pay attention to Mint Gold Type as one of the key indicators of the health of the coin market (and quite often, a guide to their inventory value!). One of the advantages of our ***Coin Market Index*** charts as they appear in each week's ***Bluesheet*** is that they allow us to see the "big picture" in each series. In the April 3, 1992 ***CCDn***, the Mint Gold Type CMI stood at 625.61; this week it stands at 613.30 — close enough to be considered *unchanged*. Of course, the roller coaster of the year is readily apparent in graphing the CMI for those 12 months.



In the second quarter of 1992, it looked like Mint Gold had no friends, and values kept steadily eroding. During the second half of 1992, it was *almost* impossible to lose money in this market. Nearly all issues were in ascension at year end, and many dealers took their profits by selling into the rising market. So far in 1993, gold has been slowly declining. As useful as it is to have an *overview*, it is still necessary to examine the numbers underlying the 'average'. Most of the time, you can safely bet that an 'average' is made up of big losers and big winners. This is certainly true in Mint State Gold. Since April of 1992, there have been some big winners that continue to greatly outperform the market.

The star of Mint State Gold has to be the Type 3 Gold Dollar. In MS64, Bid has risen from $1,060 to $1,500, for a spectacular 42% increase; in MS65, Bid has climbed from $1975 to $2525, for a 28% climb; in MS63, Bid moved from $785 to $975 for a 24% rise. Two points seem particularly germane here. First, in any of these three grades (which should be considered the "heart" of the collector/investor demand range), this coin was ***affordable***. You didn't need to put $23,500 at *risk* to buy a *Type 2* Gold Dollar in MS65 — a coin which managed a 15% increase during the same 12 months, or $11,300 to buy the same type in MS64 and earn a 21% gain. Second, and I draw no conclusion from this observation, the smaller denomination Mint Gold coins (holding the greatest numismatic premium over bullion content) seemed to have performed the best.

The late-92 rally was especially kind to Quarter Eagles, and they have done O.K. for anyone who decided to hold instead of sell in December. The $2.5 Liberty Head in MS63 was Bid at $695 last April, and is now at $890, for a 28% increase; in MS64, the Lib climbed from $1,110 to $1,310, for a 18% gain. The $2.5 Indian in MS63 climbed from $705 to $825 for a 17% increase; in MS64, the increase from $1,740 to $1,950 was good for a 12% increase; and in MS65, Bid increased from $4,700 to $4,800 for a 2% gain. Again, these coins are *affordable* in these grades, a key point in attracting new investors or collectors to the market.

Dear CCDN Subscriber,

Below are a few of our new purchases. Please remember we will **NOT** be undersold on any item. So if we have what you want — CALL Spectrum **NOW**.

Spectrum Numismatics Int'l.

1900 $2½ PCGS PROOF-66..........$16,000

A gorgeous two-tone cameo. Superbly mirrored fields accent the creamy devices. 1989 high was over $50,000 — CALL NOW!

1907 $20 High Relief PCGS-65 ... $27,500

The classic American coin that everybody needs to own. A partial wire rim encircles this chiseled piece of Americana. They don't come any nicer.

1911 MATTE PROOF SET! NGC $2½-67 $5-66 $10-65 $20-65... $142,500

A charming original set, accompanied by the **original envelope** it rested in since 1930. We sold a similar set in 1989 for 375K. We feel this is an unparalleled chance to buy a real performer for the next Bull run. Remember — when this is gone, there are no more — not even at twice the price.

Selective Equilibrium: Discounted Sells Balancing Rising Bids

The current market is starting to behave with a touch of schizophrenia, or to put it more gently, the market is stable *on average* with *some* extreme pluses and minuses canceling each other out. While the indices remain relatively stable, this pattern of activity (which we have seen before) gives a certain uneasy "air" to the marketplace. In a totally efficient market, selling to "the market" (meaning selling at the current market Bid level) means giving up just a little bit of extra profit by foregoing the benefits of negotiation and compromise. Unfortunately, the coin market still has a long way to go before reaching the levels of efficiency that permits that kind of selling without some negative effects. Simply put, we are seeing selected coins trading at levels lower than logic dictates. Now, we are the first to agree that coins are worth what they are worth, but we see little good coming from a coin normally Asking at a $300 level being sold to the highest *visible* Bidder at $220 one day, when the next day a fresh Bid of $260 is seen in the marketplace. While it is true that the market 'punishes' those who are too busy or preoccupied to find the best buyer, it is unfortunately also true that too many such sales cast a negative tint on market activity. This would be most unfortunate now, as there remain many positive aspects to the current market. Activity is still picking up, as is strength in Bidding support at current levels across many of the charts.

Among the positive aspects of this market, Auctions and major Coin Shows continue to demonstrate the customer appeal of rare coins. Heritage Numismatic Auctions just concluded one of their Bullet sales at the National Gold Convention held in St. Louis, reporting total prices realized of $582,750. Most of the lots sold for less than $1,000, indicating the continuing strength of collector demand; quality coins, even those with larger populations, still inspire buyer activity. Among the highlights of the sale (see inset):

In this week's charts, Silver Commemoratives are steady with some discounting in the MS64 & MS65 columns. Gold Commemoratives are steady with a few scattered discounts. Morgan Dollars are showing quite a few plus signs across the chart, and especially in the higher grades. Just to confuse matters, some of the most severe discounts also occurred on Morgan Trades. Peace Dollars are mixed with a little slippage in the middle grades. Mint State Type turned in a mixed performance, with slight changes found on selected issues. Mint State Gold Type was mixed, with many plus signs signaling a rebound after recent profit-taking.

Proof Type was active, with scattered plus signs from Pr61 through Pr64. Proof Gold Type was steady. Buffalo Nickels remain active in MS65 & MS66 with numerous plus signs in both the early and late dates. Mercury Dimes are mostly unchanged, as are the Walking Liberty Halves. Bids on rising on many Pr64-Pr66 Singles.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective (on one or both sides) with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's but command some premium over non-P/L strikes

Take the Superior Challenge

Superior Galleries invites you to sell one lot in any of our 1993 auctions for no commission and prove why we are the number one auction firm in the world!

We want your coins for:

July 26, 1993
U.S. Coins
Held prior to the ANA Convention in Baltimore, Maryland

•

September 26-28, 1993
U.S. Coins
Held prior to the Long Beach Show

•

December 9-11, 1993
World and Ancient Coins
Held in conjunction with the New York International Coin Show

This coupon entitles the bearer to consign one U.S., World or Ancient coin consignment (valued over $2,500) to be sold for no commission.

- Acceptance of lot is conditional upon acceptance of our standard auction contract by both parties.
- Liberal cash advance available.

If you have one coin or an entire collection, contact Larry Goldberg, Ira Goldberg, or Kevin Lipton

Is the Market at a Turning Point? Dealer Opinions Run the Gamut

Dealers are expressing a great deal of uncertainty about the future direction of the market (which is a change from the more usual contradictory but *certain* opinions that dealers normally express). The reason for the uncertainty is clear enough - the market is showing very selective weaknesses & strengths at the same time. Actually, this has been going on for several months, but the trend is growing more apparent, and it is starting to affect some of the traditionally strong series. For example, Silver Commemoratives have been a reasonably steady performer for two years (as you might expect a *popular* series to be in a collector-dominated market).

Since the beginning of 1992, the ***CCDn CMI*** for Silver Commems has *averaged* 657.82. In the beginning of 1992, the Commem ***CMI*** stood at 651.12, slowly climbed to 714.00 during the second quarter of '92, only to slowly decline to 635.70 by year's end. During the first quarter of '93, the CMI rose to 654.99, and has recently settled at ***(649.45)***. Altogether, a pretty steady show of strength, and one that could be used to argue for future market stability. *Instead*, we expect the ***CMI*** to decline further because **sight-unseen** Bidding support (at previous levels), especially in the higher grades, has virtually disappeared. Numerous trades have taken place at discounted levels, resulting in drastic declines for some Bids. Silver Commems will remain popular, ***to be sure***, but dealers are uncertain about the proper levels for wholesale support. If wholesale prices continue to slip, you can be certain that retail prices will inevitably follow.

Dealers arguing for continued market growth will point to the stability enjoyed by market participants in recent years. The CMI stood at 722.82 in January of 1992, and this week can be found at 723.40. And there are real signs of market strength occurring. Granted, many of the increases are on selected grades on selected charts, but even *selective* increases in a steady market ***must*** be viewed favorably. MS65 Morgans have risen to $90, a sign of a steady-to-stronger market. MS65 & MS66 Buffalo Nickels are continuing their sustained climb; a sign of a steady-to-stronger market. Saints are looking good; a sign of a steady-to-stronger market. Many other charts are steady as well.

The bottom line is that we don't know which group of dealers is better at predicting the future. There are *definite* signs of weakness in the market, and there are *definite* signs of strength. Overall, the MS61 through MS64 columns seem to have greater bidder support, but many of the plus signs are coming in the higher grades. This market is obviously being driven by very selective demand forces, and that means that dealers have to be on their toes at all times. Own a piece in demand and you stand to make real money if you are aware; buy an out-of-demand coin and you have real negotiating power. We live in interesting times....

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Anxious Sellers May Leave Money on Table
One Dealer's Sale Can Be Another's Gain

At various times over the past few years we have seen some remarkable (and one is tempted to say *illogical*) behavior in the market. We refer specifically to "negative spreads", that is, when dealers offer to sell coins for less than other dealers are actively Bidding ***sight-unseen*** (we are not discussing here the far more common problem of *sight-seen* Bids exceeding Asks). Some of this is bound to occur in a market that is still not ***efficient*** — in fact, negative spreads might serve as a good definition of "non-efficiency". When not every participant in a market shares the same information, buyers and sellers will sometimes 'slide' past each other, and introduce a new level of complexity into the art of negotiation.

With multiple electronic Bidding systems, messaging systems and selling vehicles in the marketplace, just keeping up with all the information is more than a full-time job - trust us, *we know all about that!* It is not surprising that negative spreads occur on occasion. The seller may have simply missed the Buy message, the seller may be in a rush to move the coin, the buyer may need to obtain a piece quickly and is willing to pay over market, it may be a question of timing, the coin may be ugly, or, as recently happened, the seller may refuse to do business with that particular buyer — any of these *may* be true. However, these reasons, as logical as they may seem, don't really explain why we occasionally see a *raft* of these spreads.

While "negative spreads" could be found in many different series this week, there were some notable examples in the Morgan Dollars. One seller was offering MS66 generics at $230 while there were active Bidders for quantities at $250+. Another seller was offering a 1923 in MS65 at $110, while a Bidder was offering $118. A Seller was asking $730 for his 1902-O Morgan in MS66, while a sight-unseen buyer was willing to pay $850. A consistent Bidder was offering to pay $200 for a 1924 Peace Dollar, while a seller would have been satisfied with $148; in MS66, the same coin was being Bid (sight unseen) at $1200 and offered for sale at $775! That is a lot of money to leave on the table.

Fortunately, the market provides plenty of opportunities to remedy the situation. Depending on whether the Buyer or Seller discover the other party first, the transaction will probably occur at very different levels. If the sale occurs at a lower level, the buyer will be understandably happy, although the news may have a negative effect on the overall market. As is often the case, one of the regular tape readers will spot the message, and a little arbitrage will take place. This is not without risk, but you can safely assume that the 1924 Peace Dollar in MS66 mentioned above *should* be a decent looking coin, and certainly worth an opportunity to double up.

Silver Commemoratives were steady, with a few discounted sells in the MS64-MS66 columns. Gold Commems showed scattered declines across the "lower' grades. Morgan Dollars enjoyed some renewed bidding activity, with many plus signs in MS63 through MS66. Peace Dollars advanced in MS63 through MS65. Mint State Type was steady, with scattered changes. Mint State Gold Type advanced in MS61 through MS64. Proof Type enjoyed scattered plus signs, especially below Pr64. Proof Gold Type was steady. Buffalo Nickels continued active in MS65 & MS66, Mercury Dimes continued steady, and many Walkers below MS65 advanced.
